

Floor Map: how to use

Open Floor_Map_Simple.xlsx. No macros, nothing to set up. Everything is counted in pallets.

PUT A PALLET AWAY

1. Click a square on the **Map**.
2. Click the **little arrow** next to it.
3. Pick the item. The square fills with colour.

TAKE A PALLET OUT

1. Click the square.
2. Press **Delete**. The square goes back to stripes.

MOVE A PALLET

1. Take it out of the old square (**Delete**).
2. Put it in the new square (**arrow**, then pick).

NEW ITEM?

1. Go to the **Stock** sheet.
2. Type it on the first empty row: **code, description, zone**.
3. It now shows up in the arrow list on the Map.

CHANGE A ZONE NAME?

1. Go to the **Stock** sheet.
2. Type over the name in the **pink box** on the right.
3. The Map changes by itself.

What the colours mean

	Coloured square	A pallet is there
	Stripes	Free space
	Red square	Wrong zone: move it
	Grey	Not ours: don't use

LOW on the Stock sheet means you're nearly out: time to order.
